Lead Committees review individual Principal Risks at each formal meeting (Quality Committee; Finance Committee; People, OD and Culture Committee; Risk Committee). Risk Committee reviews the entire BAF quarterly.

# **Executive Summary**

Each principal risk in the BAF is assigned to a Lead Director as well as to a Lead Committee, to enable the Board to maintain effective oversight of strategic risks through a regular process of formal review. The 7 Principal Risks are:

- PR1 Significant deterioration in standards of safety and care
- PR2 Demand that overwhelms capacity
- PR3 Critical shortage of workforce capacity and capability
- PR4 Failure to achieve the Trust's financial strategy
- PR5 Inability to initiate and implement evidence-based improvement and innovation
- PR6 Working more closely with local health and care partners does not fully deliver the required benefits
- PR7 Major disruptive incident

Lead committees have been identified for specified principal risks and consider these at each meeting, providing a rating as to the level of assurance they can take that the risk treatment strategy will be effective in mitigating the risk.

# Healthier Communities, Outstanding Care

The Risk Committee further supports the lead committees in their role by maintaining oversight of the organisation's divisional and corporate risk registers and escalating risks that may be pertinent to the lead committee's consideration of the BAF.

To provide Board oversight, a report of significant operational risks is available in the reading room. This report outlines significant risks on the Trust's risk register at the time of the last Risk Committee, and the respective principal risks on the Board Assurance Framework to which they apply.

The Risk Committee reviews all 'Significant' risks recorded within the Trust's risk register every month. This process enables the Committee to take assurance as to how effectively significant risks are being managed and to intervene where necessary to support their management, and to identify risks that should be escalated.

Schedule of BAF reviews since last received by the Board of Directors on 5<sup>th</sup> November

- Quality Committee: PR1 and PR2 12<sup>th</sup> November and 11<sup>th</sup> January
- People, Culture and Improvement Committee: PR3 and PR5 21<sup>st</sup> January
- Finance Committee: PR4 30<sup>th</sup> November, 21<sup>st</sup> December and 26<sup>th</sup> January
- Risk Committee: PR6 and PR7 9<sup>th</sup> November, 7<sup>th</sup> December and 12<sup>th</sup> January

Suggested amendments to the respective sections of the BAF are detailed below, and on the attached document additions to the text are in red type and removals are in blue type (struck out).

A couple of changes to the format of the BAF are also proposed:

- A table on the front page of the BAF containing a summary of each Principal Risk
- The removal of the risk treatment strategy field in each Principal Risk this does not provide any meaningful information

The current risk ratings for PR1, 2, 3 and 4 are all 'significant' and remain above their respective tolerable risk ratings'. PR1, 2 and 3 reflect the combined threats of COVID-19 and winter pressures.

The current risk rating for PR7 remains 'high' (at the tolerable level) and includes the potential impact of COVID-19 and Brexit.

Board members are requested to:

- Review the Principal Risks in light of proposed changes agreed by the respective lead committees
- Consider the implications of current risk ratings being above tolerable levels
- · Agree any further changes
- Approve the BAF subject to any further changes identified

Details of changes to the BAF since the last review by the Board of Directors, including agreed outcomes from lead committee reviews

#### **Quality Committee**

#### PR 1: Significant deterioration in standards of safety and care

Threat: A widespread loss of organisational focus on patient safety and quality of care ...

Plans to improve control

- Action amended Intranet documents review
  - Timescale: amended to March 2021
