

Elective Placements

Student nurses nationally have a 4 week elective placement in their 2nd year.

This can be anywhere in the world so long as it is deemed safe and appropriate.

Whereas travelling to another country may seem an attractive idea it is self-funding and may pose certain problems and risks for the student. So

Why not look at what Sherwood Forest Hospitals NHS Foundation Trust can offer.

Central Midlands location - easily accessible from many areas of the country.

Rural areas such as Derbyshire easily accessible as well as cities such as Nottingham, Sheffield & Derby.

What can we offer?

High level of support from dedicated staff who are trained and are passionate about providing high quality student learning.

You don't need to be supported by a registered nurse but you will be supervised by someone who is suitably experienced in that area who will help you work towards achieving the outcomes you have set.

Established placements developed specifically to support students during their elective experience including Tissue Viability, Infection Control and Research & Innovation Team.

Bespoke Placements

Is there a specific area that is of interest to you ?

Are there any related areas where you would benefit from spending time in each ?

Are you looking to work within the area when qualified and wish to see what is available ?

Please discuss your elective placement requirements with
