"I had a conversation with someone who was a member of Proud2bOps and they told me of the benefits. I thought I would attend one session to see if I found it of benefit...3+ years later I'm still here!"

"It's been a challenging and frustrating time for Ops. It's also been rewarding and I don't think this is recognised enough. Yes we provide health and care, and clinical leaders are central to this, but so are Ops leaders. Proud2bOps does however recognise us and helps us to raise our profile. This is supporting, comforting and motivating. Fantastic network"

"It's a great network and really inspiring to hear different people's experiences, and projects/activities. I have also really benefited from the health and wellbeing aspects – just to be with people who feel the same and share coping mechanisms and connect"

"I think the network is a value adding space and I just cannot imagine it not being there now"

"Joining and be actively involved in Proud2bOps has reenergised me and made me feel inspired to lead different and focus on my career journey"

"Just a thank you – it's been an absolute pleasure being part of such a fantastic forum. Makes the hard days much easier when you know you're not alone"
