Shared Learning	For Escalation
Following attendance at a recent inquest, Dr J Hutchinson provided a learning summary paper as he felt that although there was no criticism of the Trust relating to the case but listening to the family's evidence was helpful and highlighted ways we may be able to improve our care. Summary paper attached, this has been shared with the clinical teams across the Division.	Current Position at 08/09/2022: there are 25 open SJR's Clinical haematology - 2 Diabetes & Endocrinology - 7, of which 1 is a LeDeR review Gastroenterology - 4 Geriatrics & Rehabilitation - 8 Respiratory - 4
Microsoft Word Document	There are two LeDeR deaths awaiting formal review, one of which was reported 08.09.2022, the case notes have been ordered for the relevant consultant to complete. There are 2 hospital acquired covid deaths that are likely to be StEIS reportable but not yet reported on StEIS.
