Q3 Data from ME Office - Acuta Child Deaths We had 5 x child deaths reported in Q3

Q3 - Data from ME Office - Community Deaths. 65 x community deaths were scrutinised during Q3

#### Issues raised by the bereaved

- Our late father's dementia resulted in him displaying challenging behaviours. The carers on Ward 21 were fabulous in managing his needs. The hospital security staff were also exciltent in their management of dad's sometimes aggressive/agitated outborks.
- The Ward 64 and Ward 61 Teams were fantastic in their care of us, the family, as well as our relative (the patient). Communication with us was really good. Thank you.
- We were well informed, and the staff nursed him very well on Ward 34, they never left the family out of discussions/decisions
- We are very grateful for the care given by the Short Stay Unit. So much love and kindness were shown to us all by all the amazing hospital staff that we encountered.
  - Cold drivin were bought to us in a jug and food was provided to car mother. Our mother was invited to stay on the ward to provide comfort to
    her use and die was very guteful for this, this having a learning disability means that he needed that earns support, and company is likely
    dryp of like.
  - · We were very touched that the staff and residents he lived with were able to visit and say their goodbyes.
  - The kit to take handprints provided by the Chaptaincy Team meant that we were able to take a memory away of him that will be cherichted by
    us obways. This has ready helped the family in the growing process.
- The care provided to mum and us, her doughters, was unquestionably excellent. The caring teams on Ward 51 were
  respectful, kind, honest, caring, responsive and levelled the care delivered perfectly. The teams made a huge
  difference in mum's last days.
- The Medical and Nursing Teams on the Short Stay Unit were phenomenal, superb. We could not have asked for more. The use of anticipatory medications was very professional, and a lot of compassion was shown to the family

#### Positive feedback for the Bereavement Centre and ME service staff from families

- Family was unaware such a service existed and were very grateful for the calls and guidance provided from the teams. Well done everyone
- Thank you to the Medical Examiner Service Team (which includes the Bereavement Centre) for the service that you provide. You make a difficult time like this, very much more bearable.

#### Learning from inquests & Deaths which have met SI criteria

- No new Regulation 28s (prevention of future deaths)
- SI related to hospital acquired infections (COVID) demonstrate good overall compliance with infection control processes

## Macro: Comparators and crude rate

CUSUM breaches	There are currently 24 CUSUM alerts breaching the 99% threshold in the period Dec-21 to Nov-22; and 6 at the 99.9% threshold:  Deficiency and other anaemia Intestinal infection Liver disease, alcohol-related Other lower respiratory disease Pleurisy, pneumothorax, pulmonary collapse Viral infection There are 3 CUSUM alerts at the 99% threshold for Nov-22: Liver disease, alcohol-related Nutritional deficiencies	Significant Diagnosis Groups (Superspells Last 12 Months; Observed Deaths) (* new in BOLD)	<ul> <li>Urinary tract infections (1183 superspells; 28 deaths)</li> <li>Outside HSMR Basket <ul> <li>Complications of surgical procedures or medical care (403 superspells; 8 deaths)</li> <li>Fluid and electrolyte disorders (374 superspells; 20 deaths)</li> <li>Fracture of upper limb (620 superspells; 8 deaths)</li> <li>Genitourinary symptoms and ill-defined conditions (1639 superspells; 5 deaths)</li> <li>Intestinal infection (944 superspells; 24 deaths)</li> <li>Open wounds of head, neck and trunk (187 superspells; 8 deaths)</li> <li>Other connective tissue disease (1833 superspells; 21 deaths)</li> <li>Other endocrine disorders (197 superspells; 8 deaths)</li> <li>Other infections, including parasitic (202 superspells; 23 deaths)</li> <li>Other non-traumatic joint disorders (395 superspells; 7 deaths)</li> <li>Other skin disorders (1242 superspells; 24 deaths)</li> <li>Superficial injury, contusion (445 superspells; 14 deaths)</li> <li>Viral infection (1565 superspells; 119 deaths)</li> </ul> </li> </ul>

#### Data from ME Office – Acute Adult Deaths

**Oct 22** - 156

Dec 22 -

**Nov 22** - 160

230 = 546 Acute Deaths

100% of all deaths were scrutinised & within the following timeframes –

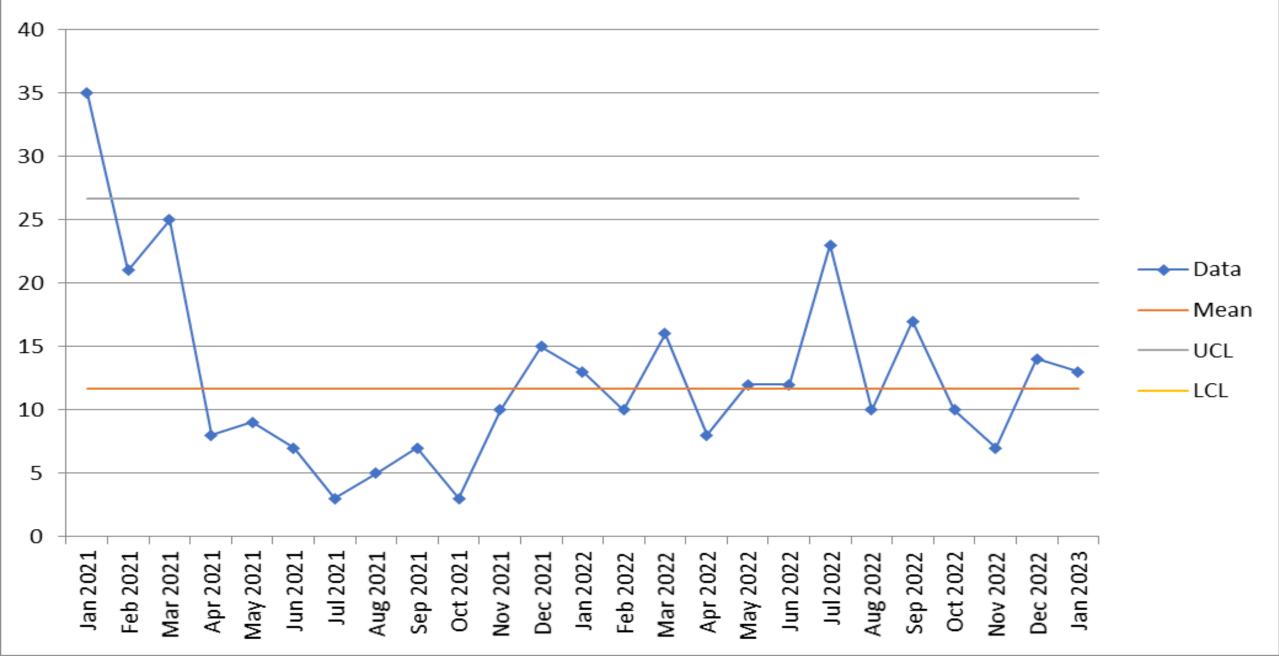

Day of death or 1 <sup>st</sup> Day after death -	288
2 <sup>nd</sup> Day after death -	122
3 <sup>rd</sup> Day after death -	88
4 <sup>th</sup> Day after death -	25
5 <sup>th</sup> Day after death -	14
Over 5 days -	5
Ambulance Deaths -	4

MCCD's issued within 3 x calendar days of death (Excluding referrals to Coroner) = 89.87% - Slightly down on previous quarter due to back to back Bank Holidays - Xmas & New Year. } 4<sup>th</sup>, 5<sup>th</sup> & Over - relate to deaths on Friday as next working day being Monday is already 3<sup>rd</sup> day after death plus the double bank holiday periods

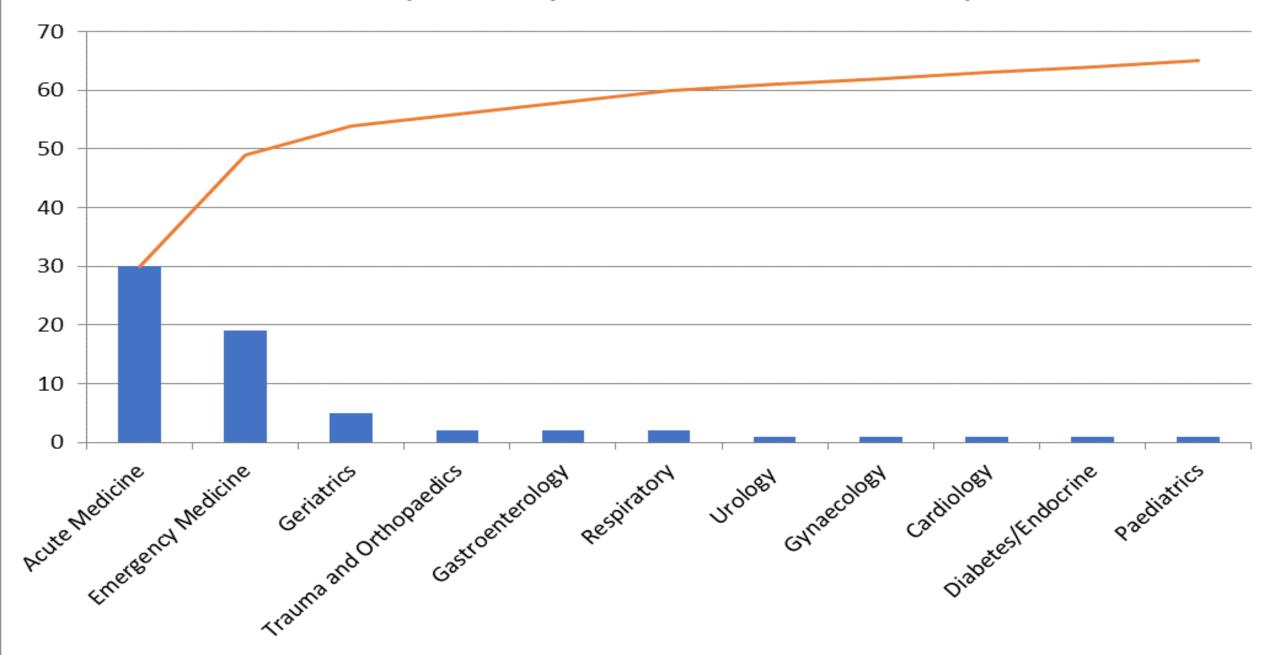

Q3 Data from ME Office – Acute Child Deaths We had 5 x child deaths reported in Q3

Q3 – Data from ME Office – Community Deaths. 65 x community deaths were scrutinised during Q3

#### All SJR requests by incident date and status

#### SJR requests open in excess of 45 days

# Micro: Individual Output

# Positive feedback for the Bereavement Centre and ME service staff from families

• Family was unaware such a service existed and were very grateful for the calls and guidance provided from the teams. Well done everyone

• Thank you to the Medical Examiner Service Team (which includes the Bereavement Centre) for the service that you provide. You make a difficult time like this, very much more bearable.

## **Issues raised by the bereaved**

- Our late father's dementia resulted in him displaying challenging behaviours. The carers on Ward 21 were fabulous in managing his needs. The hospital security staff were also excellent in their management of dad's sometimes aggressive/agitated outbursts.
- The Ward 44 and Ward 41 Teams were fantastic in their care of us, the family, as well as our relative (the patient). Communication with us was really good. Thank you.
- We were well informed, and the staff nursed him very well on Ward 34, they never left the family out of discussions/decisions
- We are very grateful for the care given by the Short Stay Unit. So much love and kindness were shown to us all by all the amazing hospital staff that we encountered.
  - Cold drinks were bought to us in a jug and food was provided to our mother. Our mother was invited to stay on the ward to provide comfort to her son and she was very grateful for this. Him having a learning disability meant that he needed that extra support and company in his last days of life.
  - We were very touched that the staff and residents he lived with were able to visit and say their goodbyes.
  - The kit to take handprints provided by the Chaplaincy Team meant that we were able to take a memory away of him that will be cherished by us always. This has really helped the family in the grieving process.
- The care provided to mum and us, her daughters, was unquestionably excellent. The caring teams on Ward 51 were
  respectful, kind, honest, caring, responsive and levelled the care delivered perfectly. The teams made a huge
  difference in mum's last days.
- The Medical and Nursing Teams on the Short Stay Unit were phenomenal, superb. We could not have asked for more. The use of anticipatory medications was very professional, and a lot of compassion was shown to the family
