

## INFORMATION FOR PATIENTS

# Urticaria and your diet

You have been diagnosed with a chronic skin condition called urticaria.

This leaflet is a guide of food types high in histamine and tyramine which may make your urticarial worse. These compounds are naturally present in some food in various amounts depending upon the food's freshness and ripeness. If you find any of these foods do worsen your condition, it would be best to avoid them or reduce the amount of them you eat.

### Foods high in histamine:

- Mature cheeses, especially parmesan and blue cheeses.
- Alcohol, especially red wine.
- Pickled and tinned foods.
- Smoked meat products e.g. salami.
- Fish - tuna, sardine, salmon, anchovy fillets.
- Fermented food products.
- Shellfish.
- Beans and pulses.
- Vinegar.
- Foods with preservatives and artificial colourings.

### Foods with histamine releasing capabilities:

- Most citrus fruit.
- Tomatoes.
- Chocolate.
- Spinach.
- Nuts.

### Foods containing tyramine:

- Cured/smoked/aged food products like cheeses and meats.
- Game.

- Beers.
- Yeast products.
- Soy products such as tofu, miso soup and bean curd.

**If you require further support then please ask your GP to refer you to a dietitian.**
