

INFORMATION FOR PATIENTS

Undergoing a colonic transit study

Patient name:

Date of birth:

Your appointment date is:

Wednesday at 10am.

Please start your preparation on:

Thursday

You have been referred for an x-ray examination called a colonic transit study. The study will assess how long it takes for food to pass through the bowel and try to determine the cause of your symptoms.

This leaflet tells you how to prepare for the examination and what you should expect when you arrive in the x-ray department.

Preparation

You should have received seven capsules and you must start to take them six days before your appointment.

Any medications known to affect the bowel (for example laxatives and dietary fibre supplements) should NOT be taken from the day you start taking the capsules until after the x-ray.

Throughout this time, you should remain on your normal diet.

All other medications can be taken as usual.

Day 1 (Thursday)

Take the 1st capsule at 10am.

Day 2 (Friday)

Take the 2nd capsule at 10am.

Day 3 (Saturday)

Take the 3rd capsule at 10am.

Day 4 (Sunday)

Take the 4th capsule at 10am.

Day 5 (Monday)

Take the 5th capsule at 10am.

Day 6 (Tuesday)

Take the 6th capsule at 10am and the 7th at 10pm.

Day 7 (Wednesday)

This is your appointment day. Please leave any valuables at home. You are responsible for all personal items you bring into hospital and the Trust cannot accept responsibility for their loss or damage.

What happens in the x-ray department?

- You will be asked to change into a hospital gown.

- You will be required to lie on your back on the x-ray table while the radiographer takes an x-ray of your abdomen.
- Once the radiographer has checked that the image is adequate the examination is complete.

What happens after the examination?

Once the examination is complete you can continue your normal diet and restart taking any laxatives you had stopped.

Contact us

If you have any doubts regarding any of the above instructions, please do not hesitate to telephone us on 01623 672202, Monday to Friday, from 9am until 5pm.

Getting your results

When your study is finished no instant diagnosis can be made. The images produced are recorded digitally and reviewed by a specialist radiographer. The radiographer sends a report to your doctor who will discuss the results with you.
