The Trust participates annually in the national NHS Staff Survey. In 2017 the Trust surveyed all staff and over 2500 staff responded, giving a response rate of 57%. This was joint 7th highest in England for acute NHS Trusts, where the average response was 44%.

Overall the survey results were positive and identified significant sustained improvement over the last two years. The overall indicator of staff engagement was 3.87, which was well above average when compared to NHS Trusts of a similar type. Our Trust was rated the 4th best acute Trust in England for staff satisfaction with the quality of work and care that they provide. This is the second year in succession that we have been in the top 20% for this.

A more detailed over view is contained in the paper, together with comparisons with local NHS Trusts and intended actions.

Recommendation

The Board of Directors is asked to take assurance from the report that staff engagement in the Trust is improving and that on the whole the staff in the Trust are positive about the Trust as a place to work and to receive care.
