6. Timely Access 6.2.3 Using the ambulatory network's toolkits for 'breaking the cycle' methodology every 8 weeks	Green Completed 30/09/2015	Blue		
Detail:				
<p>SFH chose to call its 'Breaking the Cycle' methodology 'There's No Place Like Home' (TNPLH). It began the iterative process in October 2015 and has run on four separate occasions with differing success. The team recognise that winter pressures limit the success of this change methodology as has the ongoing movement of the senior management in the medicine and urgent care divisions. The dates of the events have been: TNPLH 1, 14 – 23 October 2015; TNPLH 2, 9 – 18 December 2015; TNPLH 3, 3 – 12 February 2016; TNPLH 4, 15 – 24 March 2016</p>				
Evidence:				
<p>TNPLH1. This evidence demonstrates the planning that went into developing TNPLH.</p> <p>During the first iteration of the improvement methodology the number of referrals that were cared for in CDU instead of ED increased by some considerable margin.</p> <p>This was fed back to the team.</p>	<div style="text-align: center;"></div> <p>6.2.3 TNPLH creating the buzz v1.ppt</p> <div style="text-align: center;"></div> <p>6.2.3 email from TNPLH1.pdf</p> <div style="text-align: center;"></div> <p>6.2.3 Feedback from TNPLH1.ppt</p>			
<p>TNPLH 2 Number 4 on this action plan demonstrates the plan to continue to increase the number of patients referred to CDU and reduce the number of 0 day LoS to EAU.</p>	<div style="text-align: center;"></div> <p>6.2.3 action plan for TNPLH 2.pdf</p>			
<p>TNPLH 3 & 4. Whilst there were no specific changes planned during TNPLH 3 and 4, the team continued to see an increase in CDU usage and decrease in 0 day LoS in EAU.</p> <p>TNPLH 3 & 4 went ahead however and there was a report for each iteration.</p>	<div style="text-align: center;"></div> <p>6.2.3 TNPLH3 feedback presentatio</p> <div style="text-align: center;"></div> <p>6.2.1 confirmation of increase in CDU numt</p> <div style="text-align: center;"></div> <p>6.2.3 reports from TNPLH 3 & 4.pdf</p>			
On-going monitoring arrangements:				
<p>TNPLH is discussed within the Emergency Flow Steering Group, chaired by the COO. The expected outcomes from the events, i.e increasing the use of ambulatory pathways and reducing the LOS are also reviewed in that meeting and the performance meetings of the relevant division.</p>
