Executive Summary				
<p>The 7 Day Hospital Services (7DS) Programme was developed to support trusts to deliver high quality care and improve outcomes on a 7 day basis for patients admitted to hospital in an emergency.</p> <p>The four priority standards were selected to ensure that patients have access to consultant-directed assessment (Clinical Standard 2), diagnostics (Clinical Standard 5), interventions (Clinical Standard 6) and ongoing review (Clinical Standard 8) every day of the week.</p> <p>This framework has been developed as a result of work between a number of trust MDs and NHSI and E as potentially an improved way to continue to implement 7 Day standards.</p> <p>This framework has now been accepted nationally and we will need to report in this format from April 2019.</p>
