Executive Summary				
<p>The Seven Day Hospital Services (7DS) Programme was developed to support providers of acute services to deliver high quality care and improve outcomes, on a seven-day basis for patients admitted to hospital in an emergency.</p> <p>From 2019 Trust performance is assessed by survey, conducted prospectively over a seven day period. This first survey covered the 7 days from 13th - 19th February 2019. An initial sample size of 140 patients was used, spread across 4 clinical divisions.</p> <p>The assessment is against 4 clinical standards :</p> <ul style="list-style-type: none"> • First Consultant review within 14 hours • Appropriate ongoing Consultant reviews for patients • Providing an assessment of the provision of relevant diagnostic tests • Availability of Consultant directed interventions <p>Results</p> <p><u>Time to 1st Consultant Review</u> The proportion of patients seen and assessed by a suitable consultant within 14 hours of admission is: 94%. This is an improvement on previous surveys</p>				

On-going Consultant Review

The overall proportion of patients who required twice daily consultant reviews and were reviewed twice by a Consultant was 100 %.

The overall proportion of patients who required a daily Consultant review and were reviewed by a Consultant was 90 %. This was split into 94% at a weekday & 79% at a weekend.

Trauma and Orthopaedics Service is an outlier for Consultant reviews.

Access to Diagnostics

All applicable diagnostic tests are available 7 days a week

Access to Interventions

All applicable interventions are accessible 7 days a week

Conclusion

The 7DS survey demonstrated that the Trust met all four of the clinical standards with the exception of required on-going Consultant review at the weekend. Trauma and Orthopaedics Service is an outlier and this has been raised with their leadership team.

The next survey will be conducted in May 2019
