

INFORMATION FOR PATIENTS

Occupational asthma assessment (OASYS)

Your consultant has asked us to give you a simple peak flow meter, which will allow you to make measurements of your breathing, as and when required, throughout the day.

What will happen during the test?

A physiologist will show you how to use the peak flow meter and will instruct you how and when to perform the breathing tests.

We will also ask you to keep a diary of your daily symptoms and inhaler use.

How long will the test take?

You will be with us for around 30 minutes when collecting the machine and up to 15 minutes when your recording is brought back to be downloaded.

Please bring with you a list of your current medications.

Please continue to take all prescribed medication as normal.

The results

The results will go to your doctor who will explain them to you at your next clinic visit.

What if I need hospital transport?

You will need to arrange transport by telephoning the following numbers between 7am and 9pm, Monday to Saturday (please use the number for the area you live):

- Nottinghamshire: 0345 266 9662
- Derbyshire: 0300 300 3434
- Lincolnshire: 0848 357 1556.
