

## Sherwood Forest Hospitals Wound Care Formulary 2022

This wound care formulary has been agreed following a purchasing project with 18 other Trusts in the East Midlands Region. This project aimed to provide high quality products for wound care whilst enabling Trusts to gain from the cost savings available by agreeing on a regional formulary.

First line stock items are agreed on an individual ward basis and will be supplied by Procurements Department; the majority of second line products will be supplied by Pharmacy Department on an individual patient basis. Second line products must be recommended by the Tissue Viability Team or a Consultant.

Some items or specific sizes will be available via Procurements on an 'as required' basis. These items have a minimum 48 hour delivery time. Some items will not be on your individual ward or department stock list from Procurement: your ward or department leader or the Tissue Viability team will need to request them if they are required for a specific patient.
