Research Snapshot

Your inside look into the world of research at SFH

SPECIAL EDITION

Welcome to the special edition of Research Snapshot. As a team we want to share our successes and contribution in the Global fight against COVID-19.

We have a range of studies open that investigate treatments, sampling and data collection. See below our timeline of how these studies have developed during the pandemic.

OUR COVID 19 RESEARCH TIMELINE

ISARIC opened to recruitment

A study involving multiple samples at differing time points. This study has evolved to include more samples and an increased data set.

05/02/2020

First patient recruited to ISARIC

16/03/2020

RECOVERY Trial opened to recruitment

A randomised evaluation of COVID 19 therapy, which involves various known medications to analysis the most effective treatment against COVID19

27/03/2020

First patient recruited to RECOVERY

30/03/2020

GenOMICC Trial opened to recruitment

The study looks at how susceptible how patients are to life threatening infections by taking blood samples to look at their DNA and cells.

01/04/2020

First patient recruited to GenOMICC

01/04/2020

Thanks to @SFHresearch for amazing support, and especially in recent weeks recruiting to @ISARIC1 and #recoverytrial. You're all stars!

How has COVID-19 impacted your health and wellbeing? What has been helpful or not to your mental health? Please take 15 minutes to completed this questionnaire.

The PRIEST Study opened to recruitment

An observational study of patients attending ED with a suspected respiratory infection, exploring ways of predicting which patients are at risk of developing complica-

03/04/2020

First patient recruited to PRIEST

06/04/2020

PAN-COVID

A national registry of maternal and neonatal outcome data on women who have suspected or confirmed COVID 19 infection.

13/05/2020

First patient recruited to PAN-COVID

15/05/2020

REMAP-CAP

A trial of critically ill patients with COVID 19 to evaluate multiple interventions simultaneously and evaluate potential interactions

11/05/2020

First patient recruited to REMAP-CAP

17/05/2020

First patient recruited to second randomisation of RECOVERY Trial - Tocilizumab

26/05/2020

MODERATE Research Study

Although the majority of studies at SFH have been temporarily suspended we still continue to run some. One MODERATE study participant has completed all treatment, where they have been treated with Skilerance for 24 weeks and his psoriasis has completed cleared. This is a great example of how research can change lives!

The research department are passionate about ensuring all patients with COVID19 or are being treated for this are given the opportunity to take part, therefore they have adapted to working a 7 day a week service and assisting whilst on the wards.

Huge Thank you to all the Consultants, Ward Staff, Laboratory staff, Pharmacy, Emergency Department & other departments we have worked with during this Pandemic

RECRUITMENT TO DATE

ISARIC - 162	PAN-COVID - 2
Recovery - 79	REMAP-CAP - 1
GeNOMICC - 23	Wellbeing
PRIEST - 224	Survey - 277

Want to get involved?
