

INFORMATION FOR PATIENTS

How to use an Easi-Breathe inhaler

This leaflet will inform you how to use an Easi-Breathe inhaler.

Always read the patient information leaflet which comes with this inhaled medication.

This is an Easi-Breathe inhaler device, which comes in different colours indicating different medicines.

If your inhaler contains a steroid medication, remember to rinse your mouth out afterwards to prevent soreness.

The benefit of using your inhaler correctly is that your asthma or chronic obstructive pulmonary disease (COPD) will be controlled more effectively.

Incorrect use of your inhaler may result in reduced control.

To use your Easi-Breathe inhaler device effectively follow this step-by-step guide:

1. Use only as prescribed.
2. Shake the inhaler.
3. Hold the inhaler upright and pull the cap down.
4. Breathe out gently and keep the inhaler upright. Then put the mouthpiece in the mouth and close lips and teeth around it.
5. The air holes on the top must not be blocked by the hand.
6. Breathe in steadily through the mouthpiece. **DON'T STOP** breathing when the inhaler puffs and continue taking a really deep breath.
7. Hold the breath for about ten seconds.
8. For a second dose, wait a few seconds before repeating steps 1-7.
9. After use, hold the inhaler upright and immediately close the cap.

How to clean the Easi-Breathe:

- Unscrew the top.

- Keep the top of the body casing dry at all times.
- Wipe the inhaler casing with a dry cloth.
- Clean weekly.

How to store the Easi-Breathe:

- Store away from extremes of temperature.
- Do not freeze.
- Do not puncture, break or burn the canister, even when empty.
- Store in a safe place away from young children.

Replacement of the Easi-Breathe:

- The device is not refillable and should be disposed of once empty.
- Do not use after the expiry date.
