

INFORMATION FOR PATIENTS

How to use your Zonda inhaler

This leaflet will inform you how to use the Zonda inhaler correctly.

This is a dry powder inhaler used for patients with chronic obstructive pulmonary disease (COPD). The medication is released slowly over several hours to help reduce breathlessness.

Incorrect use of the device and not using it regularly as prescribed may result in reduced control.

The inhaler comes in a box with the medication contained in capsule form; these are clear so you can see the medication inside. The capsules are contained within a small plastic bottle.

To effectively use your Zonda inhaler, follow this step-by-step guide:

1. Use only as prescribed.

2. Lift the dust cap and mouthpiece on the inhaler.
3. Open the dust cap fully, and then lift the mouthpiece upwards and into the dust cap.
4. Take a capsule from the bottle immediately before you want to use it, and then close the bottle tightly.
5. Place the capsule in the centre chamber in the base of the inhaler. **Never place a capsule directly into the mouthpiece.**
6. Once the capsule is inside, close the mouthpiece. You should hear a click. Leave the dust cap open.
7. Hold the inhaler with the mouthpiece upwards. Press the white piercing button down the side completely in and release. **Only do this once.**
8. Breathe out away from the mouthpiece.
9. When ready to take your next breath in, place the mouthpiece between your lips. Breathe in deeply so that you hear or feel the capsule vibrating inside the chamber, until your lungs are full.
10. Remove the inhaler from your mouth. Hold your breath for as long as is comfortable. Breathe out gently. Repeat these inhale and exhale steps again to empty the capsule completely.

Remember to breathe away from the mouthpiece.

11. Open the mouthpiece and discard the empty capsule in a bin. You can also check that there is no medication left in the capsule at this point.
12. Close the mouthpiece and dust cap.

How to store the Zonda inhaler

Always keep in a dry place away from children and pets. Check the manufacturer's instructions and the patient information leaflet.
