

INFORMATION FOR PATIENTS

Extended preparation prior to colonoscopy

Morning and afternoon appointments

For a colonoscopy to be effective it is essential that the bowel is adequately cleansed prior to the procedure. A number of people will require additional preparation prior to colonoscopy, including laxatives and prolonged dietary restrictions leading up to the procedure. People who have constipation or diabetes, take medications which prohibit effective bowel cleansing and have had previously failed attempts at colonoscopy due to poor results from standard bowel cleansing will benefit from additional preparation.

Please scan the QR code on the right using your phone's camera, to view a video, which will help you prepare for the colonoscopy.

It is important that you follow the guidance below starting seven days before the date of your procedure to aid effective bowel cleaning prior to your appointment.

☐ **Laxido supplied** – ten sachets (if not received please contact Endoscopy unit).

Seven days before	Stop taking iron medications if you take them		
Six days		Drink two litres of water.	Take Laxido – one sachet am and one pm.
Five days	Follow the low residue diet guidance found with your bowel prep information.	Plus, two litres of water	Take Laxido – one sachet am and one pm.
Four days	Follow the low residue diet guidance found with your bowel prep information.	Plus, two litres of water.	Take Laxido – one sachet am and one pm.
Three days	Follow the low residue diet guidance found with your bowel prep information.	Plus, two litres of water.	Take Laxido – one sachet am and one pm.
Two days	Follow the low residue diet guidance found with your bowel prep information.	Plus, two litres of water.	Take Laxido – one sachet am and one pm.
One day	Follow the low residue diet guidance found with your bowel prep information. No food after 1pm.	Plus, two litres of water.	Take 2 Senna tablets (15mg) in the evening. Start taking your Plenvu.
